

## **RESTRICTED USE PESTICIDE**

Because of high acute toxicity of triphenyltin hydroxide and its potential for affecting fetal development. For retail sale to and use by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicators certification.

## **SUPPLEMENTAL LABELING FOR USE ONLY IN THE STATE OF MONTANA**

### **Super Tin 80<sup>7</sup> WP Fungicide AGPAK<sup>7</sup> Water Soluble Pack**

**EPA Reg. No. 1812-350  
EPA SLN No. MT-01-0004**

### **Application Instructions for Control of Cercospora on Sugar Beet**

**Use Rate:** 2.5-5.0 oz/acre (15.0-7.5 acres/2.34 lb pack or 3.0-1.5 acres/7.5 oz pack or 10.0-5.0 acres/25.0 oz. pack).

**Ground** (Closed cabs only): Apply in at least 15 gallons of water. Full coverage of the foliage is necessary for best results.

**Aerial:** (helicopter or fixed wing aircraft): Apply in 5 to 10 gallons of water.

### **Ground and Aerial Applications:**

Diluted spray should be directed uniformly to all parts of the plant. Use lower gallonage when plants are small and increase volume with plant size. Use the lower rate for protective sprays and the higher rates later in the season or during high infection periods. Application should begin when leaf spot conditions appear or when the disease is in the area and repeated at 10 to 14 day intervals. Do not exceed 10 ounces per acre per season. Do not treat within 7 days of harvest. Do not graze or feed beet tops to livestock.

### **IMPORTANT**

All applicable directions, restrictions, precautions and Worker Protection Standards on the Super Tin 80 WP package label are to be followed. This labeling contains supplemental instructions and restrictions for use of this product which may not appear on the package label. Follow the instructions carefully. This labeling must be in the possession of the user at the time of pesticide application.
